

Automate your site security

Integrate Rapid workforce management software with Gallagher's powerful site management platform, Command Centre.

Enhance security of your sites

Empower your administrators and managers to streamline site access control.

Access group customisation

Link personnel types in Rapid to different Access Groups in Command Centre to provide flexibility and enhanced control over cardholder access.

Automatic updates

Near real-time updates to ensure cardholders' access to site is granted or revoked based on events that occur in Rapid.

Remote access management

Ensure only inducted and compliant personnel can access site and or secured areas based on their compliance status within Rapid.

Boost efficiency with a fully integrated system

Remove manual handling and reduce risk with this powerful integration.

Reduce double handling

Use the Rapid system to automatically communicate with Gallagher's Command Centre and create a user profile.

Tailored configuration

Manage competencies for personnel types in Gallagher's Command Centre, directly related to requirements within Rapid.

System requirements

Advanced security policies are applied in the integration between Rapid and Gallagher's Command Centre to ensure end-to-end data protection.

Rapid Global

Users require Rapid Induct for this integration, with the option for using Rapid Contractor Management for more advanced competency requirements.

Gallagher's Command Centre

Users require Command Centre v8.60 or higher with the competency feature module and REST Cardholders enabled as well as the connection via the Gallagher Cloud API Gateway.

Fully integrated modular workforce management software.

Increase data privacy and security

Protecting your company's information is our highest priority. Rapid's information systems are ISO 27001 certified which demonstrates our commitment to industry standard protocols to safeguard your sensitive information.

ISO 27001 certified data centres

Our data centres are committed to meeting the highest standards of information security and are ISO 27001 certified.

Encryption

The latest encryption methods are applied to prevent unauthorised access to data while at rest and in transit.

Two-factor authentication

Powered by Google Authenticator app, two-factor verification (2FA) provides an additional layer of protection, helping to secure your account against password breaches, keylogging, and other cybersecurity threats.

Free support

Our Client Services team are ready to help you with technical questions and ensure you get the most out of your Rapid products.
