

Gallagher Mobile Connect

The Gallagher Mobile Connect solution gives you greater certainty at every door, transforming your mobile device into an access card.*

Gallagher Mobile Connect

Using Bluetooth® wireless technology and the power of smart phones, we've developed a unique mobile access application with optional two-factor authentication which offers easily administered credential provisioning and the added convenience of a secure, on-phone Digital ID.

Extra secure

With optional two-factor authentication, you can add an additional security step to gaining access (use your fingerprint, enter a PIN or face ID authentication).

Easy provisioning

Access can be set up remotely in advance of site visits, and can even be scheduled to begin and expire when needed.

More range options

With the Mobile Connect solution, you can adjust read ranges to suit your requirements.

Simple to manage

Our subscription model allows credentials to be issued and reissued as needed, plus they can be shared with other sites under a single subscription with a single provisioning process.

Greater convenience

No need for separate access or ID cards. You can access Gallagher and Salto BLE readers at multiple sites and display multiple Digital IDs, as well as log on to readers to perform alarm management functions, all from one mobile app.

Efficient communication

Push notifications allow you to communicate important information efficiently with cardholders, especially in emergency situations.

Trusted authentication

Mobile Connect uses FIDO open-standards, ensuring user credentials are safe and secure, using a globally recognized method authentication.

Complete control

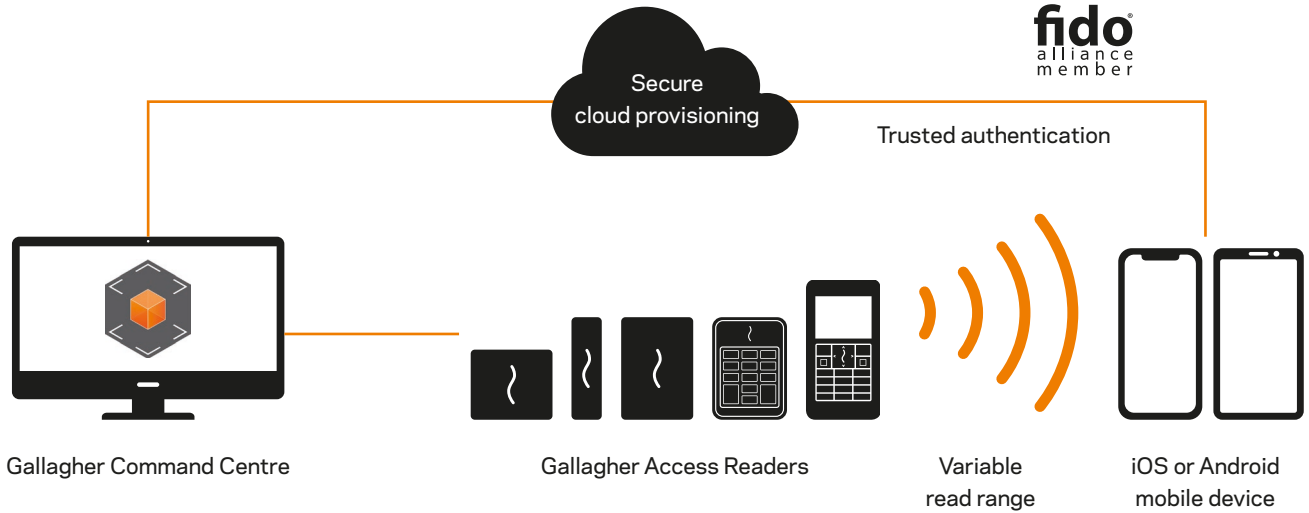

From the app you can interact with your building systems, manage alarms, and much more with triggered outputs.

* Requires Gallagher readers equipped with Bluetooth® wireless technology

Gallagher Mobile Connect

System Architecture

*Functionality is available from Command Centre v7.60 and requires Gallagher T-Series Multi Tech readers, and suitable mobile devices.
