

Peripass streamlines yard operations with self-service check-ins, smart dispatching, and real-time monitoring. We reduce wait times, enhance visibility, and improve safety. Peripass connects with TMS and WMS for efficient, scalable, and future-ready yard performance.

### Yard Control Tower

- ✓ Virtual yard & dispatch dashboard, for insights on the site.
- ✓ Manage waiting trucks during peak times or limited space.
- ✓ Automatic dispatching with smart, predefined business rules.
- ✓ Connect sensors, cameras, barriers, and more for precise real-time monitoring.

### Yard Asset Management

- ✓ Real-time overview of all trailers, containers, and assets.
- ✓ Configurable kiosks to support all movements for loading and unloading.
- ✓ Reduce detention & demurrage fees.

### Self Service

- ✓ Multilingual registrations, both on mobile and at kiosks with a user-friendly touchscreen.
- ✓ Automatic and digital communication with drivers in their preferred language.
- ✓ Ensure compliance with integrated safety tests, certifications, and blacklists.

### Yard Task Management

- ✓ Automate task management with real-time feedback: no more manual radio communication.
- ✓ Perform quality checks in all types of feedback (photo, RFID, seal reading, etc.).
- ✓ Workforce operator app for spotter and/or handler instructions.

### Yard Automation

- ✓ Access control integration.
- ✓ Autonomous weighing through integration with multiple weighing systems.
- ✓ Guarantee process compliance and store all data centrally with our "Business Rule Engine".
