# Protecting what's important

*"Innovation is in our blood. Every day we are inspired by our customers to develop the very best technology, manufacture the highest quality product, and deliver the strongest possible security solutions."*

— Sir William Gallagher  
CEO, Gallagher Group Limited

Keeping your people and your business safe is the cornerstone of what we do. Gallagher is built on a solid foundation of innovation, we are driven every day to design and develop world-leading technology that provides certainty for a safe and assured future.

With a strong focus on delivering genuine business value, our solutions will help you create smarter, more secure, and more cost-effective environments.

Gallagher solutions include command and control software, access devices, intruder intelligence, and perimeter sensor

technology, our technology is currently being used to protect people and optimize organizations in over 130 countries.

We're excited to work with you to create a security solution that protects your world now and into the future.

## State-of-the-art solutions

Gallagher's security solutions protect some of the world's most valuable assets. Our experience in the security industry and acclaimed expertise in research, design, and development, has seen us grow into a multi-national organization. Our security and business management systems are trusted and employed in all major industries, including national and local government, military and defense, transport and logistics, critical infrastructure, mining, corrections, finance, education, entertainment, and healthcare.

Gallagher's Command Centre security management platform is recognized as one of the world's most powerful

security systems. At its core, the system integrates access control, intruder alarms management, perimeter security, and business policy execution. Command Centre provides a single operator interface across a broad spectrum of functionality.

Able to integrate and interface with multiple third-party systems, Command Centre provides a central platform to connect and exchange security information. Leveraging a client-server architecture with a powerful and versatile feature set, Command Centre enables system operators to configure, monitor, and control their security system with exceptional visibility over site activities and incidents.

## Access control

From one door to thousands of doors, Gallagher's access control solution provides organizations with peace of mind that movement throughout their site is managed simply and efficiently to ensure operational continuity and a safe, secure environment.

Our access control provides the flexibility to be tailored specifically to your requirements, now, and in the future. There are multiple access options, from contactless cards to mobile or biometric access, and the ability to integrate building systems and services such as heating, air conditioning, printing or locker use.

## Mobile Solutions

Gallagher mobile solutions allow you to take your security on the move. Whether it's the flexibility to monitor a system from any location, or the convenience of using a smart phone in place of an access card or ID card, our extensive range of mobile solutions are designed to deliver user-friendly technology, underpinned by the strongest security.

## Emergency response

In an emergency, Gallagher's access control solutions allow you to quickly and easily lock down the site with the push of a button. Our Broadcast Notifications feature enables you to communicate via SMS or email to update people on site about potential hazards or shutdowns, getting critical information directly to those who need it. Gallagher's Tab Boards feature enables you to identify and account for personnel in specific zones.

## Identity management

Delivering more than traditional access control, Gallagher provides integrated identity management for employees, contractors, and visitors, across multiple sites and zones. Through credential-based access profiles, the system supports business compliance by validating, in real-time, that those entering a site or restricted zone are compliant with the necessary policies, licenses, and training.

Gallagher's T-Series range of smartcard and multi-technology readers are designed to deliver outstanding performance in high-traffic areas and to withstand adverse environmental conditions.

The durability and robust design allows for external mounting and ensures an extended life expectancy that consistently delivers a return on investment.

Effectively protecting critical sites with some of today's highest security standards is essential in ensuring the safety of the public and enforcing government laws and regulations. Trusted world-wide by corrections and defense facilities, utilities and civil infrastructure as well as government departments, we believe Gallagher solutions deliver global best practice when it comes to high security requirements.

## Perimeter solutions

Gallagher's perimeter security solutions can be tailored to suit your individual requirements and work within your budget. A monitored pulse fence provides the first line of physical defense in preventing unauthorized access, and can be used in conjunction with existing fence structures or can be installed as an independent freestanding fence.

Gallagher's networked perimeter solutions provide an advanced level of perimeter security through the use of highly intelligent controllers, detection sensors, and monitoring devices, which actively report on the fence status and generate alarms and notifications accordingly.

Controllers have the capacity to interface with other systems, including outdoor lighting – enabling lights to turn on automatically in an area where a security breach is occurring; and video surveillance – producing a visual record of attempted attacks on the perimeter.

## Visitor Management

Gallagher's Visitor Management Workstation provides a targeted user interface for reception staff to manage the arrival and departure of visitors to site – including updating visitor details, capturing ID photographs, printing visitor labels, assigning escorts, and providing a visitor access card. The system provides manual or automated email/SMS communication to notify hosts of a visitor's arrival or alert staff about a visitor whose time on-site has expired.

Gallagher's Visitor Management Kiosk integrates seamlessly with the Visitor Management Workstation, enabling visitors arriving on site to sign-in for a visit independently of a receptionist by using the touch-screen kiosk.

## Software Maintenance

Software Maintenance ensures you receive regular software updates, giving you access to all the latest enhancements, features, and improved functionality of the Gallagher Command Centre security platform. Our ongoing investment in research and development ensures we continually improve the quality and performance of our software. We offer a range of plans to ensure your security system stays up-to-date with the latest security innovations.

## Integrations

Integrations with third-party solutions enable you to bring information from imaging systems, biometrics, intercoms, elevators, non-wired doors, building management systems, and human resource programs, in to Gallagher Command Centre – creating a single, central operating platform which manages total site security.

## Scalability

Innovative solutions make sophisticated security easy to manage. Add functionality as your business grows, through highly secure, scalable, and flexible solutions.

Gallagher solutions support an unlimited number of cardholders, doors, and fence zones, providing unrestricted potential for system expansion, in line with your evolving operational needs.

## Reporting

Gallagher's Command Centre software management platform provides superior reporting functionality giving you complete flexibility for producing meaningful audit trails. Reports are easily customized and simple to create, resulting in reduced administration time.

## Data control

Through our Command Centre platform, personnel data including human resource information, security access permissions, licensing, training records, and photo identification, can be imported, managed, and shared with other systems – enabling you to maintain a single source of data.

## Built-in security

Cyber security breaches are rated as one of the top risks for businesses worldwide, and your security system is a critical part of protecting your business from cyber attack. At Gallagher, our solutions are designed from inception to be as cyber secure as possible. We continuously evolve our solutions to meet the changing threat at a software and physical level, building in robust cyber security at every stage.

Not only are security features built in to our products but all our products undergo rigorous testing by both internal and external vulnerability testers to ensure that we provide the most cyber secure products possible.

# Working in partnership

Through collaboration and personal relationships we build partnerships with our customers, channel partners, and industry partners that stand the test of time.

## Certified Channel Partners

We work in collaboration with our global network of Certified Channel Partners to deliver our products and systems to you. Gallagher Channel Partners are security installation professionals who have received accreditation through our rigorous training and product certification program.

## Industry alliances

Gallagher is proud to work with some of the best technology companies in the world to provide a comprehensive suite of security solutions.

Our third-party partnerships are developed with companies who share our values of outstanding quality, excellence in innovation, and a commitment to our customers.

## Support Services

From planning and configuring systems, to site commissioning, remote software diagnostics, and on-site assistance, supporting our customers is very important to us. To enable your staff to operate the system at its full potential, we provide in-depth and ongoing training.

# System architecture

Gallagher delivers a complete site management solution with a product architecture that flows from powerful software to robust and reliable hardware. Connected via information networks, all of the components combine to provide your site with a scalable, secure and reliable security solution.

# A truly global operation

We have offices and staff located around the world enabling us to meet with you personally and truly understand your operational needs.

Operating across a broad range of industries, Gallagher has the experience and expertise to help you strengthen

your organization's security and enhance your operational efficiency. No matter your requirements, our team of solution specialists will work with you to design a system that perfectly meets your business requirements.
