HOW YOU SCORED We've calculated your score based on 4 categories

IMPROVING YOUR SCORE Taking these actions can help you achieve a higher score

REPORT FINDINGS We've put together a list of tests we performed on your site

	We tested	We found	We recommend
High	Card Type Inactivity	4	Set Inactivity Timeout on Card Types
High	Reader 125k	5	Consider using Mifare DESFire, PIV or Gallagher Mobile Credentials, and disable 125k support on readers
Medium	Input with No Alarm Zone for All Events	34	Assign an 'Alarm Zone for all Events' to all inputs
Medium	Reader Mifare Classic	35	Consider using Mifare DESFire, PIV or Gallagher Mobile Credentials and disable Mifare Classic support on readers
Low	Cardholder with Default PIN on Cards	12	Allocate user-defined PINS to cards

NEW FOR YOU! We've created some new tests and used your last sent data to analyse your site

	We tested	We found	We recommend
Low	User Code Length	26 with 6 digits	Set Cardholders up with Card and PIN, or increase code length
Passed	Code Only Access Schedule	0	No action required

CHANGES SINCE YOUR LAST REPORT Since November 2018, these test results have changed the most
